This app is fairly simple- a little too simple at times. The only time you can indicate tooth brushing is when you toggle the in/out button, and if you accidentally hit that button you cannot go back and say you did or did not brush your teeth. The progress photo screen freezes on "uploading" so it's a roll of the dice as to whether it successfully uploads. And it's clunky to update when you've changed your aligners. Good things: looks nice, easy to interpret the wear stats screen, messaging

I use this app every day to track my treatment. I like the features it has, like the daily stats, brushing tracking, and progress photos. However, the way these are implemented leaves a lot to be desired. Editing wear times is really inaccurate and you can't add brushing times. Changing aligners is buried in settings and doesn't update automatically or prompt you. The progress photos don't use the settings - I have it set for monthly or weekly but get reminders daily still.

I've been taking weekly photos since I started wearing my aligners this Jan 2021. I recently had to get a replacement phone last week so had to download this app again. I log in and it only saved my photos through Feb. So all of my March and April pics are gone!! Why did it only save my Feb and Jan pics??? And trying to edit the amount of time I wear my aligners on the stats graph is far from accurate. Unfortunately, this app is not well developed at all and I'm done using it.

I'm glad this app is available, and I'm satisfied with its functionality. Unfortunately, it has some kinks that make it a little less user friendly than I hoped - it does lag more than a simple app should, and the ability to edit / view past days is absent. What makes this bad is that I have a 100% "brush before wearing" track record, but my stats say that I didn't brush one time. This may be a small complaint, but knowing it will never say 100% makes me sad 😞😭 please make editing a thing!
